- Launch	FileManager	- Create a Patient - Patient
- Access patient text file and initialize app using		- Access Patient - Search and sort through the Patient
FileManager		list - Report list of patients not seen by
VisitPo	ool	doctor, sorted by urgency
- Access Visit - Search and sort by Visit da	- Visit]
 Keep track of total visits of 	all	Patient
patients - Create Visit		Keep track of personal data Update birthdate and name -
		- Keep track of all Visit of this HealthCardNum
Visit		- Compares to other Patient - Birthdate
- Created from Arrival Time - Keep track of Patient, can	- Patient	instances - VisitHistory
 Keep track Vital and Symp 	toms - Symptom	
History - Add newest Vitals at specif	- Timestamp	FileManager - Load Patient data text file - PatientPool
 Report improving or worse Keep track if seen by doctor 	ning	- Load all visits associated with - VisitPool these loaded Patients - UserPool
- Record Arrival Time - Update Symptoms at speci		- Populate PatientPool using the
time	lied	given text file - Populate VisitPool using the XML
- Report Urgency Vital		file - Saves new Patient and new Visit
- Keep track of blood pressu		to the XML file - Populates UserPool from
temperature, and heart rate - The time when it's recorder	- Temperature - HeartRate	password.txt file
THE BING WHOM RE TOOLIGE	- Timestamp	Symptom
		- The description - Timestamp - Timestamp
HealthCard	Number	- L · · L
- Stores the HCN		Name
 Validates if it's a valid HCN Can be updated 		- Stores a name - Validates that this name cannot
		have invalid characters, i.e. commas.
Birthda	nte	¬
- Keeps track of a birthdate		BloodPressure
 validates if that birthdate is i.e. in the future 	invalid,	- Keeps track of diastolic pressure
		Keeps track of systolic pressure validate if given value is valid,
Tempera	iture	i.e. given 1000+ bloodpressure
- Keep track of temperature - validates if the given value	is	Son Son So Sunda
valid, i.e. negative temperatu	ire	
- can be edited		HeartRate - Keep track of heart rate
abstract		- validate given value is valid, i.e. given
History	italHistory, VisitHistory	negative heart rate - can be edited
- Keeps track of a history of		† [
